

SANGEETH S

Full Stack Python Developer

sangeethsatheesan26@gmail.com | 9778207912 | Calicut, Kerala | [linkedin.com/in/s-sangeeth](https://www.linkedin.com/in/s-sangeeth) | github.com/sangeeth-s-26

SUMMARY

Full Stack Python Developer with hands-on internship experience building responsive, scalable web applications using Django, Django REST Framework, and React.js. Skilled in designing RESTful APIs, integrating MySQL databases, and delivering user-friendly frontend interfaces. Strong foundation in clean code practices, version control, and collaborative development, with a track record of shipping complete full-stack projects from database design through deployment-ready UI.

SKILLS

- Core Languages & Frameworks: Python, Django, Django REST Framework, JavaScript (ES6+), React.js, HTML5, CSS3, Bootstrap
- Backend & API Development: RESTful APIs, CRUD operations, authentication, API integration, Django ORM
- Frontend Development: Responsive web design, component-based architecture, state management, UI development
- Database: MySQL, database design, SQL queries
- Tools & Version Control: Git, GitHub, VS Code, Postman

EXPERIENCE

Full Stack Developer — Luminar Technolab, Calicut

Jun 2025 – Jan 2026

- Designed and developed responsive, high-performance web applications using React.js and Django in a team-based Agile environment.
- Built reusable React components and implemented client-side state management to create dynamic, user-friendly interfaces.
- Developed backend features and RESTful APIs using Python and Django, integrating with MySQL for data persistence.
- Collaborated with peers on code reviews and version control workflows using Git and GitHub.

PROJECTS

BillNova — Full Stack Billing & Invoice Management System

React.js, Django REST Framework, MySQL

- Built a full-stack billing and invoice management platform enabling businesses to manage products, customers, invoices, and inventory through a responsive web interface.
- Implemented secure user authentication, automated invoice generation, real-time stock updates, and sales reporting.
- Added invoice search, PDF bill generation, and print functionality on top of a RESTful architecture with React consuming Django REST Framework APIs.

MESCO Home & Furniture — Responsive Showroom Website

React.js

- Designed and developed a modern, responsive furniture showroom website with an animated landing page and interactive product showcase.
- Built category-based browsing, gallery, about, and contact pages using reusable React components and responsive design principles for a consistent experience across desktop, tablet, and mobile.
- Delivered a premium brand identity through a custom yellow, gray, and black visual theme.

EDUCATION

Bachelor of Computer Application — Computer Science, University of Calicut	<i>2022 – 2025</i>
Higher Secondary Education	<i>2020 – 2022</i>
